Work Experience

[Freelance] Web Engineer game private server game   2019 - 2021

Fixing bugs on the website and within the game, Monitoring and managing the website and game server to ensure smooth operation. Updating the game and website.

Web & System Developer [Let'z]   2021 - 2023

The primary responsibilities involve the comprehensive development of the Let'z website, which serves as a dedicated platform featuring essential details of our partner hotels. This includes presenting key information such as accommodation rates, photographic depictions of hotel rooms, guest feedback and reviews, and other pertinent particulars.

A crucial component of this role is also the operation and management of the Channel Manager (CM) to ensure effective connectivity. Furthermore, it necessitates the creation and implementation of simple, intuitive systems for core operational processes, including Check-in/Checkout procedures, data reporting, and other ancillary functions, specifically designed for ease of use by our small partner hotel establishments.

Core Jobs / Primary Responsibilities (Updated):
1. Client Communication: Pitching services and gathering requirements from clients.
2. Website Development: Creating the Let'z website.
3. Content Management: Populating the website with partner hotel details (rates, photos, reviews, etc.).
4. Channel Manager Operation: Managing the Channel Manager (CM).
5. System Development: Building simple web-based operational systems (Check-in/Checkout, reporting, etc.) for partner hotels.
